Global CeilingTrac™ System

The CeilingTrac™ System supports any Global microscope, accessories, and even a dental light — all in one compact system.

- Electric motor-driven for easy fingertip movement
- Floating manual override movement for convenience
- Six foot or eight foot track length
- Mounts on eight foot or nine foot ceiling height
- Custom storage cabinet available

The new Global CeilingTrac™ System allows you to move your microscope between operatories . . .

. . . or to just move it out of the way.
