

# PROTEGE PLUS™ SYSTEM

6 Steps Of Magnification

Unique Offset Arm

Compact/Easy-To-Use Balancing System

Superior Illumination System

Wide Aperture Optics

Lifetime Warranty†

*The Protege Plus System is the world's first commercially available 6-step microscope for dentistry.*

*It is the perfect solution when a wide range of magnification is needed. The Protege Plus provides six steps of magnification, ranging from 2x for an ultra wide field of view, to 19x for close inspection\*. Its unique offset arm allows for more comfortable positioning and greater visualization between the doctor and assistant. Its unique compact balancing system lets you easily adjust for heavy accessories without losing finger-tip control. Furthermore, it delivers brighter and whiter illumination than traditional illumination systems. With the Protege Plus, the pluses are obvious.*

# PROTEGE PLUS™ SYSTEM

## Unique Offset Arm

*Allows for greater assistant comfort and visualization, helping in doctor-assistant communication during patient treatment.*

## Compact Balancing System

*The Protege Plus is easily balanced even with heavy accessories attached, while maintaining its smooth maneuverability.*

\*Utilizing 10X eyepieces, 250mm objectives lens, 160mm binocular

Magnification (x)	2.1	3.2	5.1	8.0	12.8	19.2
Field of View (dia.-mm)	95	62	39	25	16	10

Note: With selected components, these magnification ranges can be shifted up to 40x or down to 1x.

## 6 Steps of Magnification

*Perfect when both an ultra wide field of view and close inspection are needed in one microscope.*

- Superior Illumination — brighter than Halogen and more cost effective
- Easily mounted on the wall, ceiling, floor, or mobile floorstand
- Wide Aperture Optics — allows much better light transmission than other brands of microscopes

Designed and built with pride in the United States
